

RocksDB n=3, full bins/run=299/299/299; Ours n=3, full bins/run=299/299/299. Excluded runs: 0. Thin ticks show individual run means.
Assumed 1 s bins from monitor start; approximate 1 s alignment. Only full bins inside each recorded measurement window.
Device counters include other I/O and omit cache-served reads. Busy % alone does not prove saturation.
